

Flowjo portal license has been introduced at Kumamoto University from 2021. Flowjo is a software to analyze FCS files from Flow cytometry. We can use it at our own computer at our own conveniences.

License based on a Dongle through USB port has been used widely, although there are some weak points (e.g. ; Inconvenience when sharing among many users, Risk for damage or missing of dongle itself, Limitation of the access to the newest version of software). On the other hand, portal license based on network provide more flexibility so that one can use the latest version wherever there is a network. Portal license can be purchased as a group license at a laboratory or institute. The more users we have, the cost per license becomes cheaper (Please refer the next page).

We would like to continue in future as well, aiming to provide more benefit to the users.

### 【How to use】

Core facility takes care of account registration and provide the access (Anyone can register if you have email address at Kumamoto university). You just need to accept the invitation mail and download the software.

### 【Important notes】

- Contract is yearly basis (no split payment or cancellation before the end of contract)
- 1 license can be used at four different computers (no simultaneous use. If needed, please buy extra license)
- Account can be switched among the users at same laboratory upon request to the facility.
- Ordering, set up works including trouble supports will be taken care by core facility, so please be kindly noted that some handling fee (5,000 JPY/seat) will be charged.

We renew our license on June 1<sup>st</sup> every year. If you would like to join or have any questions, please feel free to contact the personnel below.
